

DON'T SINK SPORTFISHING

SIGN PETITION TO SAVE OUR BOATS

State Regulations Threaten Family-Owned Sportfishing Boats

Price of one-day fishing trips could TRIPLE!

Governor Gavin Newsom's Administration has stated that a majority, if not all, commercial passenger sportfishing boats will have to be removed from California waters in order to comply with engine regulations that are structurally infeasible. The mandated engines and technology are too BIG and too HEAVY, introducing stability and safety concerns!

- ☑ Regulations mark the end of family-oriented sportfishing
- ☑ Will put family-owned sportfishing and whale watching boats out of business within 3-6 years
- ☑ Will TRIPLE the price of one-day fishing trips (to over \$500), limiting access to saltwater fishing
- ☑ Threatens local jobs dependent on outdoor recreation

When the State mandates new air quality or fuel standards for automobiles, regulations apply to future production and often many years into the future. However, in the case of passenger sportfishing boats, the California Air Resources Board (CARB) is requiring boat owners to buy new boats as early as 2023. When boat owners can't afford to buy \$5 million boats or can't pass on the cost of new boats to their valued customers, they WILL go out of business.
